

The Hitachi logo is displayed in a bold, white, sans-serif font in the upper right corner of the page. The background of the entire page is a dark blue, semi-transparent image of several people in business suits gathered around a large, glowing digital display or tablet, pointing at various data points and charts. The overall aesthetic is professional and high-tech.

# HITACHI

OVERVIEW

# Intelligence & National Security

Digital solutions to power national security at home and abroad.

Hitachi Federal empowers the U.S. Intelligence Community to harness the full potential of its data for national security and operational success. With deep expertise in federal requirements and a commitment to innovation, we deliver advanced data infrastructure, intelligent management, and analytics solutions that enhance intelligence readiness, ensure data security, and accelerate informed decision-making across all mission domains.

## Meet Hitachi Federal

Hitachi Federal is a trusted leader in mission-centric digital solutions for the U.S. Federal Government. As a FOCI-mitigated, U.S.-based government contractor, we bring the full strength of Hitachi's global portfolio to federal agencies—integrating data infrastructure, AI, digital engineering, and operational technology to solve complex mission challenges.

We help agencies modernize systems, operationalize data and AI, and strengthen resilience across mission-critical environments. With cleared personnel, secure delivery models, and 24x7x365 support, Hitachi Federal is a trusted partner to the U.S. Armed Forces, Intelligence Community, and Civilian agencies.

## Core Competencies

### Data Center Modernization

Federal agencies face increasing mission demands, aging infrastructure, and rising operational risk. Hitachi Federal helps modernize data centers with a unified, resilient, and future-ready platform, Virtual Storage Platform One (VSP One), designed for today's hybrid, AI-driven, and security-conscious federal environments.

### AI Acceleration

With Hitachi iQ, Hitachi Federal delivers a fully integrated, high-performance AI infrastructure stack that unifies data, accelerates AI workloads, and simplifies operations, built on scalable, high-performance compute and storage.

### Data Management

Federal agencies are drowning in data but starving for insight. Hitachi Federal helps agencies integrate, govern, optimize, and operationalize data across hybrid and secure environments, so decision-makers can trust the data driving mission outcomes.

### Cyber Resiliency

Cyberattacks, ransomware, and data disruption are no longer hypothetical risks for federal agencies. Hitachi Federal delivers a mission-grade cyber-resiliency strategy that protects data, accelerates recovery, and ensures operational continuity before, during, and after an attack.

### Hybrid Cloud Enablement

Federal agencies need the flexibility of cloud without sacrificing security, performance, or cost control. Hitachi Federal enables hybrid cloud architectures that let agencies place workloads where they belong, on-prem, in cloud, or at the edge, while maintaining consistent operations and governance.

## Customer Story

### Delivering Data-Driven Intelligence Globally

A U.S. Intelligence Agency supporting mission partners and global tenants engaged Hitachi to transform their mission-critical data infrastructure.

Over the course of several years, Hitachi successfully virtualized and migrated the agency's legacy storage infrastructure between global data centers, modernized core infrastructure with enterprise block storage, digitally transformed the infrastructure from NAS to cloud, and implemented a modern, resilient backup and recovery strategy.

#### Outcomes:

- Unmatched data availability, scalability, and resiliency
- Readily available intelligence for mission partners and global tenants
- Data foundation for mission-critical application workloads
- Non-disruptive migration between sites
