

Pentaho Business Analytics

Explore, Visualize, and Share – Without the Wait.

Pentaho Business Analytics is a no-code data visualization tool that empowers users to **explore data, create reports, and build dashboards** – without relying on IT.

Get your data fit for reporting and create trusted data that can be quickly and easily shared across your organization.

- Reduce time to insights
- Improve access to insights
- Multi-module suite for complete self-service and simplicity

Business intelligence made simple —and powerful

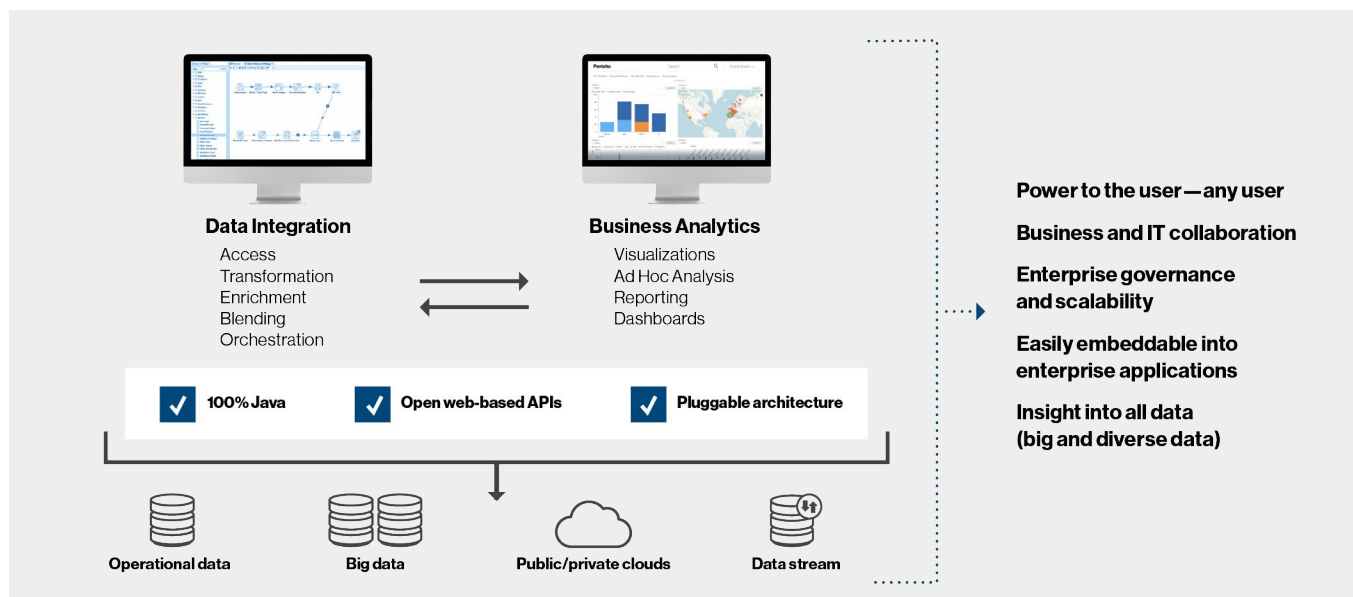

Pentaho Business Analytics is a streamlined and flexible solution that simplifies modern data and analytics challenges. It enables self-service analytics through an integrated suite of data modeling, data visualization, and reporting tools. It simplifies the ability of users across the businesses to access, integrate, analyze, and visualize their data from various sources,

“With Pentaho, we have greatly improved EULEN’s time-to-insight, with users now able to access the data they need to track key business metrics near-instantly.”

Grupo EULEN

enabling data-driven decision-making. When combined with Pentaho Data Integration, you get a robust set of tools designed to work across the entire data lifecycle from modeling to ingestion & blending to visualization & reporting.

Use analytics with powerful, cost-effective, customizable reporting, ad hoc analysis, and dashboarding. Real-time self-service capabilities and built-in data modeling enable seamless, organization-wide data-driven decision-making, empowering every department and breaking down barriers to data access. Use the Pentaho Business Analytics web-based components to share business intelligence solutions by analyzing data, creating reports, and deploying integrated dashboards.

Dynamic exploration, simplified integration, and innovative reporting tools

Analyzer: Slice and dice data dynamically beyond KPIs.

Pentaho Dashboard Designer: Deploy rich dashboards through a drag-and-drop interface.

Innovative Operational Reporting: Scale interactive and pixel-perfect reporting across the Enterprise, independent of IT dependencies.

Embeddable & Extensible Analytics

- Flexible, cloud-ready Pentaho Business Analytics is purpose-built for embedding into and integrating with your applications, portals, and processes.
- Embeddable Reports: Seamlessly embed real-time visualizations, reports, and dashboards into existing applications.
- Highly Customizable Web-Based User Interface: Robust web APIs offer maximum control over look, feel, and user experience.
- Flexible Capabilities: Multitenant deployment as well as rich single sign-on and security integration.
- Tailored Training: Access to architect-level staff who have made hundreds of organizations successful.
- API Integration: Comprehensive REST and SOAP APIs for seamless integration with other systems.
- Plugin Architecture: Extend Pentaho's capabilities with a rich plugin ecosystem.
- Third-Party Tool Integration: Integrates with popular BI tools, databases, and other enterprise applications.

Deployment Options

- On-Premises: Install on your own infrastructure for full control.
- Cloud Deployment: Deploy on cloud platforms like AWS, Google Cloud, or Azure.
- Hybrid Deployment: Flexibility to use a combination of on-premises and cloud solutions.

Develop compelling visualizations and analytics, transforming complex data into clear insights to drive informed decision-making

Empower anyone to explore data dynamically and uncover insights with just a few clicks. Our intuitive, web-based drag-and-drop interface removes complexity—so users can dig deeper, faster, without writing code.

Visualize Your Way

Build customized dashboards and reports using both built-in and third-party visualization libraries. With Pentaho's powerful Dashboard Editor, you can craft tailored data experiences that fit your business needs.

Embed Intelligence Where It Matters

Deliver real-time analytics directly into the apps where decisions happen. From building models with the Data Source Wizard to embedding insights into workflows, Pentaho puts the right data in the right place—at the right time.
